COMPUTER SKILLS

- Python, C++, SQL, IoT
- Edge AI, IoT Systems
- Matlab, Autocad
- Tableau, DBeaver, Power BI
- Business Translation, Agile (Scrum)
- Data Quality Assessment
- Smart Sensors, Embedded Systems

SOFT SKILLS

- Project Management
- Teamwork
- Effective Communication
- Leadership
- Critical Thinking

ACHIEVEMENTS

- Trainee - McKinsey Forward Program, 2023 (Digital Evolution)
- Junior Turkish Tennis Champion, 2014

LANGUAGES

- English - Fluent
- German- A2.2
- Turkish - Native

INTERESTS

- Tennis Player in 1. FCN Tennis Club
- AI Innovation
- Automotive Data Systems
- IoT & Smart Sensors
- Tennis Coach FAU and Regensburg Uni

RECEP ULAS UZUN

MASTER'S STUDENT

EDUCATION

- Master's Degree, Artificial Intelligence for Smart Sensors and Actuators**
Technische Hochschule Deggendorf, Germany (2025-..) (Grade 1) 
 - Application-oriented M.Eng. program focused on intelligent sensor.
 - Core topics: Artificial Intelligence, Machine Learning, Embedded Control, System Design, Big Data, and IoT Communication.
 - Taught entirely in English, with strong emphasis on practical case studies and R&D collaboration.
- Bachelor's Degree, Computer Engineering** 
Kadir Has University, Istanbul, (2022-2025) (Graduated)
 - Project-based education, presentation, and working in a team.
 - 100% scholarship, 100% English language.
 - Some courses; Python, C++, SQL, Data Analysis, Computer Programming, Database Systems, Operating Systems.

EXPERIENCES

- Data Science Internship** 
Vodafone Türkiye, Istanbul (2025 January -November)
 - Built automated reporting pipelines using SQL and DBeaver
 - Contributed to data quality assessment for network performance.
 - Performed KPI and performance analysis for Mobile & Fixed Broadband, supporting strategic reporting for senior management.
 - Developed Tableau dashboards for cross-team performance monitoring
- Data Analyst and Digital Trainee** 
KPMG Türkiye, Istanbul (2024 September-January)
 - Supported data analytics projects for business transformation engagements.
 - Built Power BI / Tableau dashboards for client reporting.
 - Worked in Agile/Scrum teams on automation initiatives.

PROJECTS

- Cooperative Maze (Raspberry Pi)**
 - Cooperative maze-solving with two Raspberry Pi 1B+ boards over direct Wi-Fi/WLAN
 - Lead on State-of-the-Art Research and Technical Requirements documentation
- AI-Enhanced Digital Twin for Smart Fan-Coil Cooling Optimization** 
 - Developed an AI-enhanced digital twin for HVAC-style fan-coil cooling systems using MATLAB/Simulink and Python.
 - Implemented PID-based thermal control and machine learning temperature prediction models for energy-efficient cooling optimization.
 - Designed a Streamlit dashboard for real-time visualization and interaction with the cooling simulation.
- Low-Altitude Aerial Object Detection (THI x Fraunhofer IVI x THD)** 
 - Goal: Fine-tuning YOLO for 3-9m altitude detection to improve localization and reduce ground noise.
 - Metrics: Evaluated model performance using **mAP@0.5** and **Precision-Recall** benchmarking.
- Helmet Detection (YOLOv8)**
 - Fine-tuned YOLOv8 for 3-class PPE detection (helmet on / wrong / no helmet)
 - Used Kaggle dataset, Google Colab for training
